This course received the rating 4.63 / 5 for "overall I would rate this unit as being excellent" -- the best rating among all statistics / probability / act sci courses.

This course received the rating 4.68 / 5 for "My lecturer was excellent" -- the best rating among all statistics / probability / act sci courses.

There are too many good comments in the feedback even in the section "Please provide details of what you think could be improved on this unit". I thank the students very much for these encouraging comments. I will try to teach even better in the next semester.

Some comments that I will take into account in the future are:

- reduce the number of emails sent
- show some real life applications
- increase the pace of teaching
- more support in example classes
