Feedback on course Math 31082, 41082, 61082

This was a small group of in average good students, maybe his was the reason why opinions were little bit 'homogeneous'. On the other hand there were the constructive remarks mostly about structuring lectures. Sure I will try to use these comments next year. On the other hand the requirement on this course depend very much on the general level of the group which every year is different.
