The comments + feedback from the Unit Surveys for 4/61112:

1. Too much material in the course compared to other course units
   Significant parts of the course were cut out when the course moved from being a traditional lecture course to being a reading course. In addition, a significant number of proofs are non-examinable (and marked as such in the lecture notes).

2. More support classes/examples classes
   The course is a reading course with one timetabled support class per week.
