Week 10 questionnaires feedback

There were several issues raised.

1. *Many typos in the lecture notes.* Before this year the lecture notes were handwritten and I typed them to allow more flexibility. Unfortunately this resulted in a higher number of typos, but they were corrected in the final version of the lecture notes.

2. *Sometimes the sheets are a bit too far away from the content covered in lectures.* Yes, sometimes the tutorials were a bit behind the lectures as I was trying to explain some things in more detail.
