Dr Stefan Guettel  
Feedback on MATH36001 Matrix Analysis Surveys

I'm grateful for the comments generated by the students.

Generally, the students seem to be very happy with the course. The main concerns raised were

1) the inappropriate lecture theatre [Room G.54 in the Chemistry Building] which did not allow the lecturer and student assistant an easy access to all students during the tutorials, and

2) the large number of students which made it impossible to give sufficient individual help during tutorials.

Unfortunately, both 1) and 2) are not in the hand of the lecturer but it will be requested to have the course back in the Blackett Theatre of the Schuster Building (were it was taught in 2012 and 2013), and possibly to reduce the number of students to 100 to allow for more individual supervision.
