The response rate for the unit survey was 57.81%. Thanks to those of you who took the time to leave feedback on the course. All of your comments (positive and negative) are extremely useful in helping me to make improvements.

Summary: Most people who responded seemed to have enjoyed the course...

- “Overall, I would rate this unit as being excellent”
  81% of respondents agree or mostly agree.
- “The feedback that I received on my work was helpful”
  71% of respondents agree or mostly agree.
- “This unit was well organised”
  89% of respondents agree or mostly agree.
- “The course materials were helpful”
  97% of respondents agree or mostly agree.
- “The support classes were helpful”
  73% of respondents agree or mostly agree.
- “The e-learning resources provided in this unit were helpful”
  84% of respondents agree or mostly agree with the statement.
- “Dr Marianne Johnson’s teaching was excellent”
  76% of respondents agree or mostly agree with the statement.

Of course, since this is a reasonably new course there are still some issues to be ironed out. Below is a brief summary of your comments and suggestions:

**Too fast**
The majority of you commented on the pace of the lectures. This is clearly a problem and in future I will try to go slower. Some of your other suggestions are related to this and may offer ways to tackle the pace issue...

**Too many proofs**
From your comments I think that it would be helpful if I did slightly fewer proofs on the board. Some of you did not see the point of seeing a “sketch” proof. I will review the course notes and mull this one over.

**Too many slides**
Quite a few people complained about my use of slides together with the blackboard/whiteboard. The slides were intended to act as a reference (everything that was displayed on the slides also appeared in the online notes). Since this was pretty unpopular, next year I’ll try just using the boards.

**Too many words**
I can be concise.

**Too much content in Level 4**
I’m reviewing the course and will look into this.

**Too many 9am lectures and fire alarms**
Sadly, these things are out of my control.
