Galois Theory - Exam Feedback 2014/15

I am very pleased with the outcome of the exam. Two thirds of the students achieved first class marks, and half of the students got very high marks of 84 per cent and more. Only two students got marks below 50. This came as a surprise to me since quite a few students never engaged with the course and couldn’t be bothered to attend classes.

Most students choose to do questions 2 and 4 of Section B, and did reasonably well on these two questions. It appears that as in previous years the students who regularly attended classes, in particular the tutorials, did well in the exam, proving once again that the tutorials were beneficial.

Finally, I’d like to say that this is a course I really enjoy teaching, and it is rewarding to me if the students enjoy it too. It looks as if this worked out well this year.
